CHUKWUDI JUSTIN

Automation Engineer | Low-Code / No-Code Systems

Canada | jchuks2020@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

Automation engineer who builds the internal systems a business runs on. Make certified at Level 5 (Expert), with over a year designing multi-step automations in Make (Integromat) and n8n, wired into Google Sheets, Notion, Airtable, and REST APIs. Strong hands-on Google Sheets work, from advanced formulas and structured data systems to reporting. Builds AI-powered workflows on the ChatGPT and Claude APIs, and finds the bottleneck before being asked to.

TECHNICAL SKILLS

Google Sheets and Excel: advanced formulas, lookups, pivot tables, structured data systems, dashboards and reporting
Automation Platforms: Make (Integromat), n8n, Airtable Automations
APIs and Integrations: REST APIs, webhooks, JSON, authentication and credential management, error handling, retries
AI Workflows: ChatGPT / OpenAI API, Claude API, prompt design, Apify, Tavily
Knowledge Base and Tools: Notion, Google Workspace, Slack, Teamwork, Telegram bots, Supabase, PDF.co, Softr Studio
Data and Development: Power BI, SQL, Python, JavaScript, React Native, Node.js, Express, MongoDB

EXPERIENCE

4Spot Consulting | **AI Automation Specialist** | Remote | Nov 2025 - Present

- Design and ship end-to-end automations in Make for client operations, connecting forms, content systems, file storage, messaging, and AI models so data moves between tools with no manual handoff.
- Build and maintain the Google Sheets layer behind those automations, holding company and client automation records, using formulas and structured tabs that keep reporting accurate as volume grows.
- Troubleshoot live scenarios end to end: trace failed executions, read API and webhook payloads, correct mapping and filter logic, and add error handling so failures surface instead of passing bad data downstream.
- Led a secure migration of production scenarios across environments, re-mapping credentials and securing webhook endpoints so no client data was exposed.
- Document each build in Google Docs and file it in Teamwork, so a scenario can be picked up, handed over, or changed later by someone who did not build it.

Dalhousie University, Faculty of Computer Science | **Volunteer Software Developer** | Halifax, NS | Feb 2026 - Present

- Sole developer of PosiFit, a health app for the Persuasive Computing Lab: React Native (Expo) front end with a Node.js, Express, and MongoDB backend deployed on Render, built offline-first so it works with no connection.
- Built the syncing that keeps a user's data safe when the phone is offline and lines it back up once the connection returns, with nothing lost or duplicated, and secured the backend so no personal information is collected or stored.

Sourcing Sprint | **AI Automation Intern** | Remote | Sep 2025 - Oct 2025

- Built production automations in n8n and Make for proposal generation, lead generation and outreach, invoice processing, content publishing, and daily stand-ups.
- Automated invoice capture from emails and PDFs straight into Google Sheets (Make, OpenAI, PDF.co), and consolidated multi-department data into a single reporting dashboard fed by Google Sheets and Airtable.
- Integrated OpenAI, Apify, Telegram bots, and Google Workspace through REST APIs and webhooks, removing hours of manual coordination each week.

PwC Nigeria | **Data Analyst Intern** | Lagos, Nigeria | Mar 2023 - Aug 2023

- Built dashboards and reports in Google Sheets, Excel, and Power BI that turned raw operational data into clear, decision-ready reporting.
- Cleaned and structured spreadsheet data for analysis, and helped run internal training sessions on Excel and Power BI for staff.

Everything Data | **Co-Founder** | Remote | 2023 - Present

- Built and lead a 50+ member data community across LinkedIn and Slack, mentoring professionals in analytics and visualization.

EDUCATION AND CERTIFICATION

Bachelor of Science, Computer Science | Covenant University | Sep 2020 - Aug 2024 | First Class Honours
Make Certification, Level 5 - Expert
